100 Patches for the DSI OB-6 Synthesizer  
by Tarekith

This bank of sounds was created to be used with the built in sequencer on the OB-6. While you can certainly play them normally via a keyboard, I recommend pressing Play on the OB-6 sequencer before you start browsing through the patches. You can view a preview of some of the patches here:

<https://youtu.be/rtBk0miwylw>

BY DEFAULT THE PATCHES WILL INSTALL IN **USER BANK 0**, PLEASE BACK UP ANY PATCHES YOU WANT TO SAVE BEFORE YOU OVERWRITE THEM WITH THIS BANK.

I've included the patches in sysex and MIDI file format, as well as a format that can be loaded via Soundtower Editor for the OB-6 available here:

<https://www.soundtower.com/ob6/>

This soundset is provided as donation-ware. It's free to use, but if you like the sounds I've made for you please consider a small donation via the links below. \$5 buys me a beer, \$10 buys me a better beer, and \$20 makes all my dreams come true.

PayPal to: [innerportal@gmail.com](mailto:innerportal@gmail.com)

Square Store: <https://squareup.com/store/inner-portal-studio>

Thanks, and I hope you enjoy the sounds I've created with this beautiful sounding synth.
